

PRESS RELEASE**Massa Products Corporation Adds a Deep Water Model to Its Line
of High Power Underwater Sub-Bottom Profiling Transducers**

Hingham, April 29, 2003, Massa Products Corporation of Hingham, Massachusetts announces the addition of the TR-1077A to its existing line of High Power Underwater Transducers that are widely used by geophysical survey teams for sub-bottom profiling explorations. The TR-1077A typically operates over the frequency range of 2 kHz to 6 kHz to full ocean depths.
